Hamukwaya NP Petrus Presentation Report

Portfolio Details

- GitHub username: ramuntu - Repository: HamukwayaNPPetrusPortfolio - Live portfolio: <https://ramuntu.github.io/HamukwayaNPPetrusPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on sign-in, user profile flow, and the importance of controlled access in a team project tool.

Challenge and Solution

The main challenge was presenting security-related work without exposing sensitive implementation details. The solution was a restrained access-control theme.

Learning Reflection

I gained a stronger understanding of responsible user workflows, account boundaries, and secure team collaboration.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
